Color Assessment - Clear Winter

What 'Season' Means

A color season reflects the tones, temperature, and harmony that naturally complement your skin, hair, and eyes.

Chroma • Value • Temperature

Chroma = clarity or softness.

Value = lightness or depth.

Temperature = warm/cool.

Makeup Notes For this Season:

This is the only season who can use black eyeliner :) Think bold, icy, dramatic, high contrast. Clear edges & stark lines make this season unique. Go light on both highlighter and bronzing. Punchy bold lips are amazing on winters, and whatever we do on the eyes needs to be balanced on the lips. Dewy & shimmery are friends to winter! Specific to CLEAR WINTER - The rainbow is your oyster! Take your pick, you look great in it! Colors are BRIGHT, and you wear white best of all the winters!
