# Color Assessment - Light Summer

## **What 'Season' Means**

A color season reflects the tones, temperature, and harmony that naturally complement your skin, hair, and eyes.

## **Chroma • Value • Temperature**

Chroma = clarity or softness.  
Value = lightness or depth.  
Temperature = warm/cool.

## **Makeup Notes For this Season:**

When you think of Summer Seasons, think of moonlight! Everything is soft, gentle, smoky, hazy, and muted. Not a lot of sparkle or glitter - it washes out the Summer. Smudged lines, blended well - nothing harsh. Pink undertones, not peach. No contour or bronzer or highlight. Specific to a LIGHT SUMMER - they wear PASTEL muted color neutrals - Taupes, grays, mauves and the softest blues. Soft, cool, light - delicate!!!
