Color Assessment - Light Spring

What 'Season' Means

A color season reflects the tones, temperature, and harmony that naturally complement your skin, hair, and eyes.

Chroma • Value • Temperature

Chroma = clarity or softness.
Value = lightness or depth.
Temperature = warm/cool.

Makeup Notes For this Season:

Springs are like a sunrise - warm, light, bright! Nothing heavy, nothing should weigh down a spring. Very light, shimmer looks great on them, as does bold bright lip color! Highlighter is a yes, contour/bronzer is a no. Brown, blue and gray eyeliner are do-able for this season! Softer shades on the eyes, again, nothing heavy. Stay away from matte, think dewey skin & crisp on the lines for eyes! Specific to LIGHT SPRING - think citrus! These folks are a ray of sunshine and look amazing in the softer shades of butter, coral, gold and the lightest of lilacs, too!
